

## **Hayland Woods Consulting Services**

I enjoy visiting with landowners onsite, assessing the situation, and working with them to develop a plan to protect existing resources, restore diversity and health to plant communities, and preserve water quality.

### **Services available:**

Site assessments, revegetation and stabilization plans for shoreland sites

Site-specific plant selection and plant lists for native plantings

Coordinate, direct, and assist with site prep and planting

Planning and implementing soft and hard armor stabilization and erosion control measures

Training area contractors in stabilization methods and native planting techniques

Assisting owners with required permitting and grant-writing

Educational presentations for landowners, lake associations, other organizations

Identification of native plant communities, conduct wetland monitoring
